

### **Mission**

The Faculty of Dentistry of the University of Debrecen is one of the most outstanding and dynamically developing dentistry education institution with graduate and postgraduate education both in Hungarian and English languages, trainings for healthcare professionals, scientific research activity, as well as therapeutic and preventive healthcare services of high quality.

The objective of the Faculty of Dentistry of the University of Debrecen is to make their educational, therapeutic, and research activities known and acknowledged in the professional world of dentistry in and outside of Hungary, and to be a training and therapeutic centre that meets the standards of the 21<sup>st</sup> century.

This mission is being completed by members of the academic teaching staff, employees and students of the Faculty, all being committed to quality, in cooperation with their Hungarian and international partners.

In order to achieve our objectives:

- in view of the tendencies in Europe and of meeting societal needs, the Faculty wishes to release professionals as highly qualified as possible, by continuously improving the undivided programme of the Faculty, incorporating the latest research and technological results in the curriculum, providing diverse post-graduate programmes, organising further education trainings as well as participating in trainings for healthcare professions;
- aiming at efficiency, flexibility, enhancing responsiveness, dynamic development and rationalising the management, and for the purpose of improving the quality of education, research and therapeutic activities, we are promoting the professional and personal development of our teachers and employees by continuously improving conditions;
- regarding the therapeutic and preventive healthcare services provided by us, we consider it to be our primary responsibility to provide healthcare services, which are based on diagnostic and therapeutic methods of the highest quality and on interdisciplinary cooperation, that are available to all, meet the standards of our days, and are efficient, and which can serve as a model for other institutions;
- we are running research activities of international quality to lie the foundations for innovation researches for the development of therapeutic activities, to create cooperation among those participating in such researches, and to participate in research and innovation programmes at the boundaries of different fields of science;
- we are seeking to play a prominent role in shaping the healthcare policy of the region and this country, in service of the community; we are striving to meet the labour market needs for new generations of dentists, specialists, and healthcare professionals with secondary education qualification, at regional and national level;
- we are pursuing to improve the efficiency and flexibility of, and optimise the effectiveness of our educational requirements.

Debrecen, 24 February 2020
